The real estate sales office shall be temporary in nature and used only for conducting sales activities for housing located within the development (no sales of off-site property shall be allowed). The sales office shall be removed within 30 days of completion of initial sales within the community.

18.45.015 H. Prohibited Uses.

“Gated communities,” that is, enclosed complexes of multiple residences that restrict public access, are prohibited. (Ord. 1057 § 1, 2013)

18.45.020 Conditional uses.

Conditional uses and associated development standards, if any, for an SG-SFLDR zone are those identified in Chapter 18.54 LFPMC. (Ord. 1057 § 1, 2013)

18.45.030 Lot area and maximum density.

A. There is no minimum lot area. Residences may be located on common parcels held in condominium ownership.

B. The maximum density is 20 dwelling units per acre. The density shall be calculated by dividing the number of dwellings by the total area being developed, including streets, alleys, open spaces and other common areas. In using this density calculation, the maximum density allowed in this zone can be no less than two units. (Ord. 1057 § 1, 2013)

18.45.040 Lot width.

There is no minimum required lot width. (Ord. 1057 § 1, 2013)

18.45.050 Lot coverage.

No building or combination of buildings, including accessory buildings, shall occupy or cover more than 60 percent of the net lot area. "Net lot area" shall be defined as the total land area included in the application less roads and common open space. (Ord. 1057 § 1, 2013)

18.45.060 Yards.

All buildings within the SG-SF LDR zone must comply with the setbacks and other requirements in the southern gateway – single-family residential zone design guidelines. See Section B.1.2, Conditions at Zone Edges. (Ord. 1057 § 1, 2013)

18.45.070 Building height limit.

The building height limit in an SG-SF LDR zone shall not exceed 35 feet as determined by LFPMC 18.08.160, Building (or structure) height. For residences with a sloped roof and not directly facing a single-family zone or across the street from a single-family zone, the maximum height of the building may be measured to the midpoint between the peak of the roof and the bottom of the eave; that is, half way up the slope of the roof.

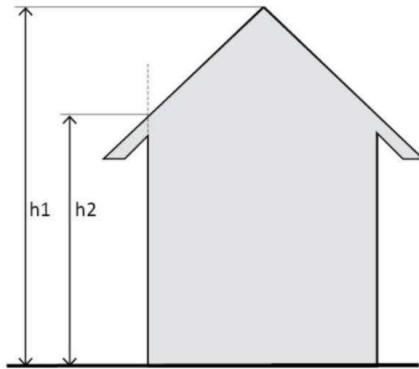

Figure 18.45.070-1. Where allowed by LFPMC 18.45.070, the height of a building with a pitched roof is $(h1 + h2)/2$, where $h2$ is measured at the surface of the roof where it intersects with a projection of the outside edge of the building wall. Where the wall/roof configuration varies, the building height shall be at the point where the height is the maximum.

(Ord. 1057 § 1, 2013)

18.45.080 Impervious surface.

The maximum impervious surface allowed in an SG-SF LDR zone shall be 60 percent of the land area included in the application; provided, that the requirements of the city's stormwater management regulations are met (see Chapter 16.25 LFPMC). (Ord. 1057 § 1, 2013)

18.45.090 Screening, landscaping and tree canopy goal.

A. All sites in the SG-SFLDR zone must have adequate screening and landscaping, subject to the southern gateway – single family low density residential zone design guidelines.

B. The provisions of Chapter 16.14 LFPMC (Tree Canopy Preservation and Enhancement) shall apply; provided, that the canopy coverage goal established in LFPMC 16.14.080(A) shall be 20 percent for the SG-SFR zone (measured over the whole site including roads, parking and service areas) and that the provisions under LFPMC 16.14.080(B) regarding designating a tree tract equal to five percent of the gross project area shall not apply. (Ord. 1057 § 1, 2013)

18.45.100 Signs.

Signs must comply with Chapter 18.52 LFPMC and, specifically, meet the requirements in LFPMC 18.52.050, Signs in RM and RS zones. (Ord. 1057 § 1, 2013)

18.45.110 Parking requirements and traffic impact mitigation.

All parking in the southern gateway – single family low density residential zone shall be provided in accordance with the following:

A. Provide two stalls for every dwelling unit.

B. Additionally, provide either:

1. At least one additional stall on site for visitors. This stall may be part or all of a driveway; provided, that the vehicle does not impede either pedestrian or vehicular movement; or

2. For those residences that do not include on-premises space for visitor parking, provide one shared stall per three dwellings on street or within a small parking lot with no more than eight spaces. The stalls should not be more than 200 feet from the residence it serves. On-street parking spaces or joint use parking spaces may be used to meet this requirement. Visitor parking must meet ADA standards in terms of number and location of accessible parking stalls.

C. The parking requirement for the overall development may be met by counting all parking spaces in garages, driveways, parking lots, on-street parking included within the development as well as on-street parking along NE 145th Street, and NE 147th Street adjacent to the site. The applicant may apply for a parking reduction for conditions that reduce the actual parking need such as joint use, special populations, etc. The code administrator may allow a parking reduction if he or she determines that the reduction is justified by a parking occupancy analysis prepared by a licensed transportation planner with special qualifications in parking analysis.

D. The applicant shall submit to the city a traffic and parking impact analysis identifying the increases in traffic and off-site parking demand. The analysis shall be prepared by a licensed professional transportation engineer. The applicant shall be responsible for implementing both on-site and off-site mitigation measures that the code administrator determines necessary to prevent significant adverse impacts to transportation systems and the surrounding area. Specifically, necessary mitigation measures, such as on-site and off-site traffic calming measures, must be taken to prevent cut-through traffic and additional parking demand on streets in the surrounding area. (Ord. 1057 § 1, 2013)

E. If a housing development in the southern gateway – residential zone is a middle housing unit, off-street parking requirements apply as follows:

1. No off-street parking shall be required within one-half mile walking distance of a major transit stop.
2. A maximum of one off-street parking space per unit shall be required on lots no greater than 6,000 square feet, before any zero lot line subdivisions or lot splits.
3. A maximum of two off-street parking spaces per unit shall be required on lots greater than 6,000 square feet before any zero lot line subdivisions or lot splits.

18.45.120 Southern gateway – single-family low density residential zone design guidelines – Adopted – Rules of interpretation.

A. The Lake Forest Park “Southern Gateway – Single Family Low Density Residential Zone Design Guidelines,” dated March 28, 2013, are adopted as guidelines applicable to applications filed under the southern gateway – single-family residential zone review process described in LFPMC 18.47.130 through 18.47.150 and incorporated by reference herein.

B. To the extent that a proposed development in the southern gateway – single-family low density residential zone provides parking or open space in excess of the minimum required by the applicable zoning code or design guidelines provision, the excess may be allocated to meet similar requirements in the adjacent transition zone, subject to the following limitations:

1. The property to which the excess parking or open space are to be allocated shall be part of the same development proposal as the property providing the excess parking or open space, as part of a commercial site development permit (CSDP) reviewed and approved pursuant to Chapter 18.48 LFPMC; and
2. The property with excess parking spaces and/or open space shall be developed prior to or concurrently with development of the property to which the excess parking or open space is allocated; and
3. Any excess parking in the southern gateway – single-family low density residential zone shall be within 200 feet of the property in the southern gateway – transition zone to be served by the excess parking.
4. No excess open space in the southern gateway – single-family low density residential zone may be allocated or used to reduce the amount of open space otherwise required by design guidelines B.1.1.d and B.8.1, or LFPMC 18.46.060(E) or 18.47.040(A)(2). (Ord. 1057 § 1, 2013)

18.45.130 Southern gateway – single-family low density residential zone design guidelines – Application – Effect.

Except as otherwise provided, any person who plans to develop or redevelop within the southern gateway – single-family low density residential zone may apply to have the proposed project processed and reviewed according to this title. An accepted application shall be reviewed under this chapter and the southern gateway – single-family low density residential zone design guidelines, both of which shall take precedence over and supersede any conflicting provision of LFPMC Titles 17 and 18, including provisions incorporated by reference into this title. (Ord. 1057 § 1, 2013)

18.45.140 Administration.

The provisions of Chapter 18.47 LFPMC and the southern gateway – single-family low density residential zone design guidelines shall be administered as follows:

- A. The applicant shall submit a commercial site development permit application on a form provided by the city planning department, along with supporting documents required by the city planning department. The submitted materials must include drawings and information needed to evaluate the proposal with respect to the southern gateway – single-family low density residential zone design guidelines.
- B. The application shall be reviewed first by the city code administrator generally under LFPMC 16.26.030(E), Ministerial Administrative Decisions, and LFPMC 16.26.040, Applications. LFPMC 16.26.035 providing for appeals to the city council shall not apply.
- C. The code administrator shall make a recommendation according to LFPMC 16.26.080 (Type I applications – Code administrator’s recommendation) and the hearing examiner shall review the application under the procedures for a hearing examiner decision stated in LFPMC 16.26.090 through 16.26.110. (Ord. 1057 § 1, 2013)

18.45.150 Bonds or other financial security.

The city may require a bond or other financial security to ensure compliance with any aspect of a permit or approval under this chapter. (Ord. 1057 § 1, 2013)

18.47.010 Purpose.

The intent of the SG-T zone is to:

- A. Encourage small to moderate scale neighborhood and community oriented residential and commercial uses which provide services to the local community, a greater range of economic opportunities and housing choices, a pleasant residential environment and a focus for the local community.
- B. Serve as transition between the more intense and larger scale development envisioned along Bothell Way and the smaller, single family low density residential character to the north and east.
- C. Support an active, walkable mixed use center.
- D. Protect the livability and attractiveness of residential neighborhoods.

The SG-T zone should provide for increased diversity for desirable business, commercial, civic, recreation, employment, and housing opportunities in a manner that is compatible with the residential character and scale of the local neighborhood. (Ord. 1057 § 3, 2013)

18.47.020 Permitted uses – Commercial and nonresidential.

The following commercial and nonresidential uses are permitted in the SG-T zone, subject to the off-street parking, southern gateway – corridor and transition zones design guidelines and other general provisions as set forth in this title, except where modified by this chapter:

- A. Retail sales of food and commodities, which involve only incidental and limited fabrication and assembly. Uses excluded from this zone would include auto service stations, sale of gasoline or other fuels, and car washes, repair or

sale of heavy equipment, boats, tires and motor vehicles, sale of alcohol for on-premises consumption except in a restaurant with a license from the Washington State Liquor Control Board.

B. Business offices and uses which render professional, personal, and instructional services, such as real estate or insurance brokerages, consultants, medical or dental clinics, technical training, health clubs, and repair of jewelry, eyeglasses, clothing, household appliances and tools, or other such similar uses; excluding vehicle or tool rentals, pet sales and veterinary clinics.

C. Government buildings and uses, including but not limited to community centers, police stations, libraries, administrative offices, and other public service uses that are compatible with the intent of the SG-T zone.

D. Day care facilities.

E. Public utilities.

F. Electric vehicle charging stations.

G. In-home businesses and services. (Ord. 1057 § 3, 2013)

18.47.030 Permitted uses – Primary and accessory residential.

The following residential uses are permitted in the SG-T zone, subject to the off-street parking, southern gateway – corridor and transition zones design guidelines and other general provisions as set forth in this title, except where modified by this chapter:

B. Single-family dwelling units are permitted in the SG-T zone; provided, that no single-family dwelling units shall front on the proposed north-south road along the west edge of the transition zone and single-family dwelling units shall make up no more than 50 percent of the residential units in the SG-T zone. Regardless of the number of single-family dwelling units in the transition zone, the minimum density in LFPMC 18.47.040(E) shall apply. Additionally, for single-family residences in the SG-T zone, the Lake Forest Park southern gateway – single-family residential zone design guidelines shall also apply.

C. Senior citizen apartments.

A. Buildings facing the north-south connector road (the envisioned street as described in LFPMC 18.47.070) shall feature either:

1. Ground floor commercial spaces and uses facing the connector road over at least 85 percent of the building frontage; or
2. At least 55 square feet of public open space for every one linear foot of connector road street frontage adjacent to the development. The public open space shall be a park, plaza or other publicly accessible and usable open space approved by the code administrator. Buildings featuring ground level units facing the connector road shall feature ground floors with at least 12 feet from floor to ceiling and have entries that meet the Americans with Disabilities Act standards so that they may be used for commercial activities;

B. Individual commercial and nonresidential uses within a structure shall contain no more than 40,000 square feet per use on a single floor. Uses greater than 40,000 square feet on a single floor and not more than 60,000 square feet

on a single floor are only permitted after obtaining a conditional use permit (LFFMC 18.47.050). For the purposes of this subsection, each residential unit is considered a separate use;

C. Business and residential portions of a building must be separated by soundproof walls, floors, equipment, utilities or other suitable architectural features or appurtenances;

D. All businesses, services, repair, processing, storage or merchandise displays shall be conducted wholly within an enclosed building except for the following:

1. Off-street parking or loading;

2. Storage and sale of goods in connection with an established use under the provisions of a temporary use permit or special event;

3. Merchandise displays which are located in the SG-C zone where proper provision has been made for screening and safe pedestrian and vehicular passage;

5. Temporary outdoor eating and drinking areas associated with permanent indoor establishments;

E. All development must include at least 25 dwelling units per net buildable acre of the portion of the site being developed. Roadways (including sidewalks and street landscaping), protected critical areas (e.g., wetlands) and common open spaces accessible to the general public are not included in the "net buildable area" calculation;

F. Drive-through window services are prohibited; and

G. Manufacturing that requires special or heavy equipment (e.g., professional quality lathes, presses, etc.) or that uses toxic chemicals is prohibited. Fabrication that uses small scale personally operated equipment such as a sewing machine or reprographic equipment may be permitted subject to the code administrator's approval. (Ord. 1057 § 3, 2013)

18.47.050 Conditional uses.

A. Individual commercial and nonresidential uses within a structure shall contain a maximum of 60,000 square feet in building footprint area (as measured on the ground) per use. Uses greater than 60,000 square feet in building footprint area (as measured on the ground) and not more than 100,000 are only permitted after obtaining a conditional use permit (Chapter 18.54 LFFMC).

B. Transit facilities such as park-and-ride and kiss-and-ride lots. A kiss-and-ride lot is a small parking and drop-off area where people can wait to pick up passengers arriving on transit. (Ord. 1057 § 3, 2013)

18.47.060 Building height.

A. The maximum building height limit in the SG-T zone shall not exceed 45 feet, except that portions of structures at least 100 feet from a single-familylow density residential zone (including the SG-SFLDR zone) may be up to 55 feet in height. Additionally, for structures near properties zoned single-familylow density residential (including the SG-SFR zone), the maximum height shall not exceed 35 feet, measured to the midpoint of the slope of a pitched roof (see Figure 18.45.070-1), plus one foot in height for every one foot more than 20 feet (measured horizontally) away from the property zoned single-family residential, up to a maximum height of 45 feet (i.e., maximum height = 35 feet + distance of portion of the structure from the SFR zone minus 20 feet).

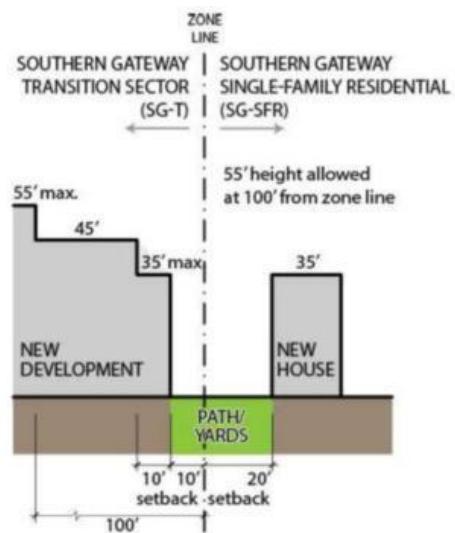

Figure 18.47.060-1. Maximum height of buildings near the southern gateway – single-family low density residential zone.

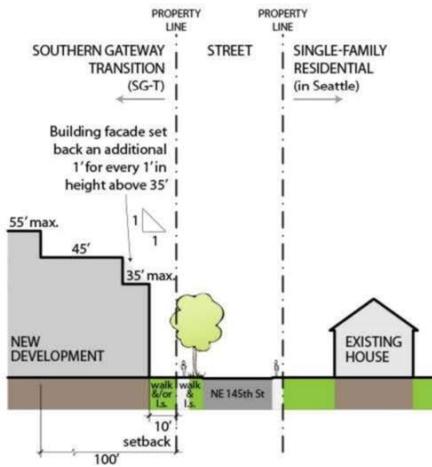

Figure 18.47.060-2. Maximum height of buildings across the street from a single-family low density zone (NE 145th Street is the only location where existing single-family residences are across the street from the southern gateway – transition zone).

B. For structures directly across the street from properties zoned single-family low density residential (including the SG-SFLDR zone), the maximum height shall not exceed 35 feet measured to the midpoint of the slope of a pitched roof, plus one foot in height for every foot more than 10 feet (measured horizontally) away from the street right-of-way, up to a maximum height of 45 feet (i.e., maximum height = 35 feet + distance of portion of the structure from the SFR zone minus 10 feet). (Ord. 1057 § 3, 2013)

18.47.070 Setbacks and north-south access road requirement.

A. Where reasonably necessary to mitigate impacts disclosed by the traffic analysis prepared pursuant to LFPSC 18.47.110(B), the city's review thereof and/or the environmental review process, approval of development in the SG-T zone between NE 145th Street and NE 147th Street may be conditioned upon construction of a north-south access street. The street will run north and south generally along the western edge of the SG-T zone. The street will be approximately 60 feet wide from backside of sidewalk to backside of sidewalk (see Figure 18.47.070-1 below). The roadway design must be submitted to the city for approval. In the absence of other direction from the code administrator, the roadway will generally consist of two 10-foot-wide travel lanes, two seven-foot-wide parking lanes (or widened sidewalks) and two 13-foot-wide sidewalks plus planting areas. (Sidewalks plus planting strips together must be at least 13 feet wide.)

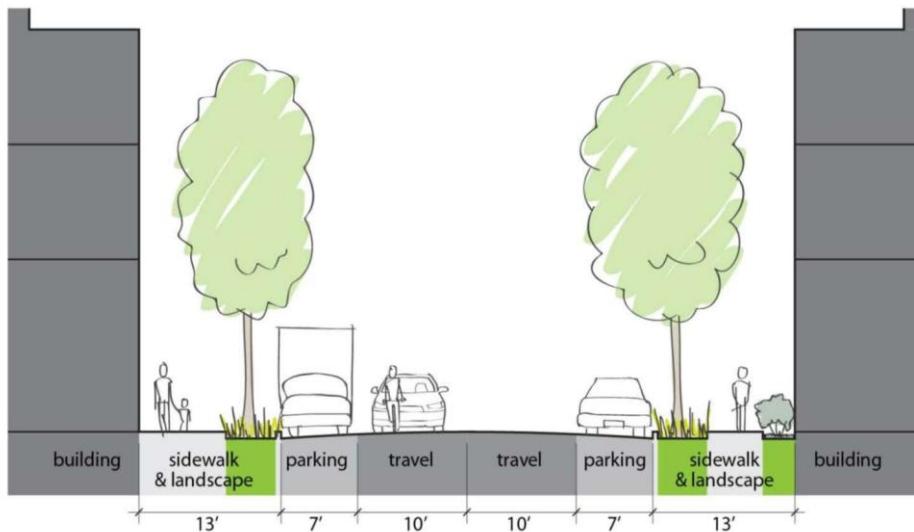

Figure 18.47.070-1. Preliminary N-S access street section.

B. Minimum setback requirements in the SG-T zone shall be:

1. Front Yard. No requirement for yards facing the N-S access street. See also southern gateway – corridor and transition zones design guidelines. For buildings facing single-family residential zones and also without pedestrian facades, buildings must be set back at least 10 feet from the public right-of-way to reduce visual impact to nearby residences.
2. No side yards required except at least a 10-foot building setback along zone boundary lines directly adjacent to a single family low density residential zone (including the SG-SFLDR zone).
3. No rear yards required except at least a 10-foot building setback along zone boundary lines directly adjacent to a single family low density residential zone (including the SG-SFLDR zone). (Ord. 1057 § 3, 2013)

18.47.080 Land coverage.

No maximum land coverage requirements provided other provisions of this title, including stormwater management and open space requirements, are met. (Ord. 1057 § 3, 2013)

18.47.090 Screening, landscaping and tree retention.

A. All sites in the SG-T zone must have adequate screening and landscaping, subject to the southern gateway – corridor and transition zones design guidelines.

B. The provisions of Chapter 16.14 LFPMC (Tree Canopy Preservation and Enhancement) shall apply; provided, that the canopy coverage goal established in LFPMC 16.14.080(A) shall be 10 percent for the SG-T zone for nonparking areas and 30 percent for open parking lots. Also, the provisions under LFPMC 16.14.080(B) regarding designating a tree tract equal to five percent of the gross project area shall not apply. (Ord. 1057 § 3, 2013)

18.47.100 Signs.

Signs are limited to those provided for in Chapter 18.52 LFPMC and the southern gateway – corridor and transition zones design guidelines. (Ord. 1057 § 3, 2013)

18.47.110 Parking requirements and traffic impact mitigation.

A. All parking in the southern gateway – transition zone shall be provided in accordance with the following:

1. Provide one stall for every 250 square feet of commercial space.
2. Provide 1.25 stalls for every dwelling unit, except that detached single-family dwelling units shall have two parking stalls per dwelling unit, plus either at least one additional stall on site for visitors or, for those residences that do not include on-premises space for visitor parking, one shared stall per three dwellings and located either on-street or within a small parking lot containing no more than eight spaces. Any additional off-site visitor parking space shall be located not more than 200 feet from the residence it serves. Where the total number of parking spaces required by this section results in a fraction, the next highest full unit shall be provided.
3. The applicant may apply for a parking reduction for conditions that reduce the actual parking need such as joint use, special populations, etc. The code administrator may allow a parking reduction if it is justified by a parking occupancy analysis prepared by a licensed transportation planner with special qualifications in parking analysis.
4. The total number of required parking spaces may be satisfied in part by use of excess parking spaces if provided as part of a contiguous development approved under LFPMC 18.45.120(B).

B. The applicant shall submit to the city traffic and parking impact analysis identifying the increases in traffic and off-site parking demand. The analysis shall be prepared by a licensed professional transportation engineer. The applicant shall be responsible for implementing both on-site and off-site mitigation measures that the code administrator determines necessary to prevent significant adverse impacts to transportation systems and the surrounding area. Specifically, necessary mitigation measures, such as on-site and off-site traffic calming measures, must be taken to prevent cut-through traffic and additional parking demand on streets in the surrounding area. (Ord. 1057 § 3, 2013)

18.47.120 Southern gateway – corridor and transition zones design guidelines – Adopted – Rules of interpretation.

A. The Lake Forest Park “Southern Gateway – Corridor and Transition Zones Design Guidelines,” dated March 28, 2013, are adopted as guidelines in the southern gateway – corridor and transition zones and incorporated by reference herein.

B. To the extent that a proposed development in southern gateway – transition zone exceeds a requirement of the applicable zoning code or design guidelines the excess may be allocated to meet similar requirements in the SG – single-family low density residential zone. This provision shall apply only to parking, impervious surfaces, lot coverage, open space, stormwater LID, and canopy coverage goals. This provision can only be implemented through a site development plan approved by the city. The required elements or conditions supporting residential development must be provided concurrently with the residential development. (Ord. 1057 § 3, 2013)

18.47.130 Southern gateway – corridor and transition zones design guidelines – Application – Effect.

Except as otherwise provided, any person who plans to develop or redevelop within the southern gateway – transition zone shall apply to have the proposed project processed and reviewed according to this title. An accepted application shall be reviewed under this chapter and the southern gateway – corridor and transition zones design guidelines, both of which shall take precedence over and supersede any conflicting provision of LFPMC Title 17 or 18, including provisions incorporated by reference into this title, as the same may be amended. (Ord. 1057 § 3, 2013)

18.47.140 Administration.

The provisions of this chapter and the southern gateway – corridor and transition zones design guidelines shall be administered as follows:

A. The applicant shall submit a site plan application on a form provided by the city planning department, along with supporting documents required by the city planning department. The submitted materials must include drawings and

information needed to evaluate the proposal with respect to the southern gateway – corridor and transition zones design guidelines.

C. The code administrator shall make a recommendation according to LFPMC 16.26.080, Type I applications – Code administrator's recommendation, and the hearing examiner shall review the application under the procedures for a hearing examiner decision stated in LFPMC 16.26.090 through 16.26.110. (Ord. 1057 § 3, 2013)

18.47.150 Bonds or other financial security.

The city may require a bond or other financial security to ensure compliance with any aspect of a permit or approval under this chapter. (Ord. 1057 § 3, 2013)

Commented [ZT3]: Department of Commerce

Comment: We did not find language allowing for sale by condominium as in [RCW 36.70A.681\(1\)\(k\)](#). We recommend adding to 18.50.050 for clarification.

Commented [ZT4R3]: Left for Council decision as whether to codify in code or not.

Commented [KP5R3]: Condominium conversions are not currently disallowed by the LPP code, but the Commerce request has been addressed by adding a new subsection H below, if the City should choose to incorporate this.

Commented [ZT6]: Commerce Comment:

18.50.050(H) states one off-street parking space unless within a quarter mile, statutory guidance in [RCW 36.70A.681\(2\)\(a\)\(i\)](#) does not require off-street parking within ½ mile so we recommend using ½ mile to be consistent and removing the director's discretion to require within ¼ mile as neither is consistent with guidance. See more on page 13 of Commerce's [ADU guidance](#).

H. An ADU may be sold as a condominium unit or as a separate piece of property through the unit lot subdivision process.

- B. In no case shall an accessory building have a floor area of more than 1,500 square feet. For the purposes of this provision, "floor area" includes floor area devoted to the parking and storage of motor vehicles.

- D. Accessory buildings shall be 10 feet or more from the main buildings.

E. Accessory buildings ~~may shall~~ be placed no closer than five feet to the rear lot line, ~~excluding a~~_{Accessory dwelling units, which ~~may shall~~} be placed no closer than 15 feet to the rear property line ~~unless abutting a public alley not routinely snow plowed, then the accessory dwelling unit may be placed along the lot line.~~

F. Accessory building height shall not exceed 15 feet, except those accessory buildings which include an accessory dwelling unit, which can be up to 25 feet in height; provided, that the building meets all zoning regulations pertaining to the primary or main building. - A. Church steeples;

Commented [ZT7]: Commerce Comment: Section 18.50.060(E) has a 15-foot setback from the rear property line. We recommend adding language that ADU's can be sited at the lot line when abutting a public alley, if it is not routinely snow plowed.

18.58.080 Landscaping, pathways and amenities.

A. Purpose. To realize the city's vision and reflect community values, all aspects of our city should ensure that the natural environment is celebrated. This includes the trees, lands, buildings and connections, as well as the spaces where vehicles park. Incorporating natural elements to provide shade, assist in managing surface water, and enhance the ecology of the location both reflect the character of the city and play an important role in combating the effect of urban heat islands that contribute to climate change.

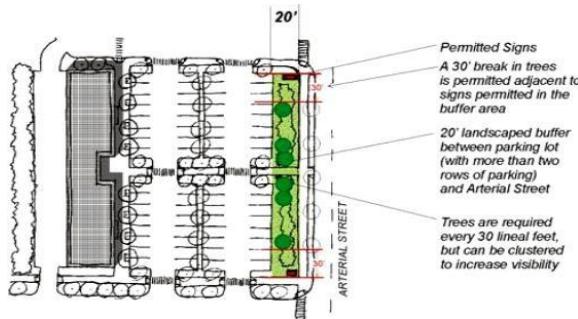

B. Applicability.

1. New projects or redevelopment projects exceeding 50 percent of the fair market value of the parking lot must comply with these regulations in their entirety.
2. Redevelopment projects not exceeding 50 percent of the fair market value of the parking lot must comply with these regulations for all new or replaced portions of the parking lot.
3. Maintenance of existing parking lots that does not include altering the footprint of the parking lot, such as grind and overlay or restriping projects, must comply with these regulations where possible.

C. Landscaping. Parking lot landscaping is required as follows:

1. Perimeter Parking Lot Landscaping.
 - a. Adjacent to Roadways. Parking lots adjacent to roadways shall include a 10-foot-wide planting bed meeting the requirements for Type 3 landscaping set forth in LFPMC 18.62.080; except trees can be clustered or staggered to improve visibility near driveways and a 30-foot break in the required tree coverage is allowed adjacent to permitted signage. Refer to Figure 18.58.080-1.

Figure 18.58.080-1: Landscaping between large parking lots and adjacent streets.

b. Adjacent to Residential Uses. Parking lots adjacent to residential uses or zones must include the following additional screening measures:

- i. A post-and-beam fence, decorative metal fence, or similar fence with minimum four-inch openings consistent with residential character and quality; and
- ii. A 10-foot-wide planting bed meeting the requirements for Type 1 landscaping set forth in LFPMC 18.62.080.

c. Adjacent to Other Uses. Parking lots adjacent to nonresidential uses on a separate lot must provide a 10-foot-wide planting bed meeting the requirements for Type 2 landscaping set forth in LFPMC 18.62.080. This requirement can be waived by the director if adjacent lots are under common ownership with the subject of the proposal.

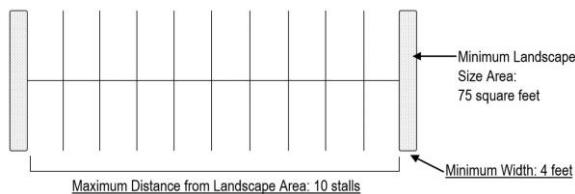

d. Adjacent to Buildings. Parking lots adjacent to buildings shall include a five-foot-wide planting bed meeting the requirements of Type 3 landscaping set forth in LFPMC 18.62.080.

e. Adjacent to Streams. Parking lots adjacent to streams as defined in Chapter 16.16 LFPMC shall include a 20-foot-wide planting bed meeting the requirements of stream buffer landscaping set forth in LFPMC 18.62.080. Where this provision conflicts with other landscaping requirements, this provision shall prevail.

2. Interior Parking Lot Landscaping. Surface parking lots must be landscaped to break up large areas of asphalt and provide visual relief as follows:

- a. Landscaping must be provided within surface parking lots at a rate of 20 square feet per parking stall. Landscaping must be designed and maintained to provide clear sight distance between three and one-half feet and eight feet above the existing street or private access road grade. Surface parking lot landscaping must be planted as follows:
 - i. Deciduous trees shall be planted at a rate of one tree per every seven stalls;
 - ii. Shrubs shall be planted no more than four feet apart; and
 - iii. Groundcovers shall be planted no more than 24 inches apart. Turf is not permissible as a groundcover in surface parking lot landscaping.
- b. Landscape islands must be placed no further than 10 parking stalls apart and at the end of each parking row. Landscaping strips may be placed between rows of parking stalls. Landscape islands and strips must be a minimum of four feet wide and have an area of at least 75 square feet. Refer to Figure 18.58.080-2.

Figure 18.58.080-2: Parking lot landscaping.

c. Landscape islands or planters must be surrounded by a standard vertical curb or similar barrier to protect the plantings from vehicle overhang. Gaps in the curb are permitted for stormwater drainage.

3. Low Impact Development. Except in landscape buffer areas adjacent to a “stream,” as defined in Chapter 16.16 LFPMC, parking area landscaping shall be used for low impact development best management practices or treatment best management practices as approved by the public works director pursuant to the stormwater management manual adopted in LFPMC 16.24.010, unless technically infeasible. The requirements for plant sizes and spacing in this section may be relaxed for bioretention facilities when supported by recommendations provided by an arborist, landscape architect, or other qualified professional.

D. Pathways Through Parking Lots. Safe and convenient pedestrian paths are required from street sidewalks through parking lots to building entries, as follows:

1. At least one pedestrian pathway must be provided for every four rows of vehicle parking spaces or fraction thereof. Pedestrian pathways must be provided at a maximum distance of 150 feet between pedestrian pathways and must be a minimum of six feet in width.
2. Where possible, pathways must be aligned to connect with major building entries or other destinations. At a minimum, pedestrian pathways must be configured to provide a convenient path to buildings or other destinations.
3. Pedestrian pathways must be clearly identifiable through special pavement, pavement markings and/or artistic painting. Signage and/or lighting provided at or along the pedestrian pathways must be pedestrian-scale.
4. Pedestrian pathways must be integrated with the required parking lot landscaping.

E. Pedestrian Amenities. All nonresidential development must provide a decorative garbage and recycling receptacle and at least one of the following pedestrian amenities near required pedestrian pathways:

1. Pedestrian furniture such as benches or low seating walls;
2. Weather protection;
3. Wayfinding kiosk;
4. Umbrellas with receptacles;
5. Perimeter landscaping in addition to the requirement in subsection B of this section;
6. Permanently installed and maintained public art. This is satisfied if the pedestrian pathway uses unique paving treatments; or
7. Other element that encourages pedestrian activity and creates a welcoming pedestrian environment, as approved by the director. (Ord. 1219 § 1, 2021; Ord. 773 § 3, 1999)

18.58.090 Drainage.

Drainage shall be in conformance with the city of Lake Forest Park standards and the Design Manual as defined in LFPMC 16.08.030. (Ord. 1241 § 13, 2022; Ord. 1149 § 5, 2016; Ord. 773 § 3, 1999)

18.62.080 Landscaping types.

A. Type 1 – Solid Screen.

1. Purpose. Provide sight-obscuring screening to separate incompatible land uses. Type 1 landscaping consists of a mix of primarily evergreen trees and shrubs placed to form a continuous screen.

2. Description. Type 1 landscaping shall consist of evergreen trees planted no more than 20 feet on center in a triangular pattern; shrubs and groundcover which will provide a 100 percent sight-obscuring screen within three years from the time of planting; or a combination of approximately 75 percent evergreen and 25 percent deciduous trees (with an allowable five percent variance), planted no more than 20 feet on center in a triangular pattern. Deciduous trees shall be at least two-inch caliper and evergreen trees shall be at least six feet in height. Shrub and groundcover spacing shall be appropriate for the species type and consistent with the intent of this section. Shrubs shall be at least 24 inches in height. Turf may constitute no more than 30 percent of groundcover.

B. Type 2 – Visual Screen.

1. Purpose. Provide a visual filter to separate higher- and lower-intensity uses. Type 2 landscaping consists of a mix of evergreen and deciduous trees and shrubs spaced to create a filtered screen.

2. Description. Type 2 landscaping shall be a combination of at least 50 percent evergreen and at least 30 percent deciduous trees, planted no more than 25 feet on center in a triangular pattern, interspersed with large shrubs and groundcover. Deciduous trees shall be at least two-inch caliper and evergreen trees shall be at least six feet in height. Shrub and groundcover spacing shall be appropriate for the species type, and consistent with the intent of this section. Shrubs shall be at least 24 inches in height. Turf may constitute no more than 30 percent of groundcover.

C. Type 3 – Visual Buffer.

1. Purpose. Provide a semi-transparent buffer to partially separate uses and soften the appearance of development projects. Type 3 landscaping consists of a mix of evergreen and/or deciduous trees spaced to create a continuous canopy.

2. Description. Type 3 landscaping shall be at least 70 percent deciduous trees planted no more than 30 feet on center in a triangular pattern and interspersed with shrubs and groundcover. Deciduous trees shall be at least two-inch caliper and evergreen trees shall be at least six feet in height. Shrub and groundcover spacing shall be appropriate for the species type, and consistent with the intent of this section. Shrubs shall be at least 24 inches in height. Turf may constitute no more than 30 percent of groundcover.

D. Stream Buffer.

1. Purpose. Provide stream buffer functions to enhance in-water and upland habitat. Stream buffer landscaping consists of native species typically found growing on stream banks in the Puget Sound lowlands.

2. Description. Stream buffer landscaping shall be designed by a landscape architect, certified professional wetland scientist, or other qualified professional using a mix of native trees, shrubs, and forbs. Stream buffer landscaping shall meet the following requirements:

a. Native trees shall be planted at an average of 12 feet on center and at an overall density of 300 trees per acre. Plants shall be a minimum one-gallon size at time of planting.

b. Native shrubs shall be planted at average of five feet on center and at an overall density of 1,730 shrubs per acre. Plants shall be a minimum of one-gallon size at time of planting.

c. Native forbs may include a mix of grasses, sedges, rushes, ferns, and other herbaceous plants and shall be planted at an average of 12 inches on center and at an overall density of one plant per square foot. Plants shall be a minimum of 10-inch plugs or four-inch pot size at time of planting.

3. Streambank landscaping shall include planting area preparation for all required planting areas. Planting area preparation includes removal of invasive weed species, decompaction of compacted soils, and introduction of soil amendments including compost and organic fertilizers. Planted areas shall be mulched with a uniform three-inch depth of wood chip mulch. Trees and shrubs shall be protected from herbivore and rodent browsing with plant protection tubes. (Ord. 1220 § 1, 2021)
