40' Parking Structure

LFP City Hall

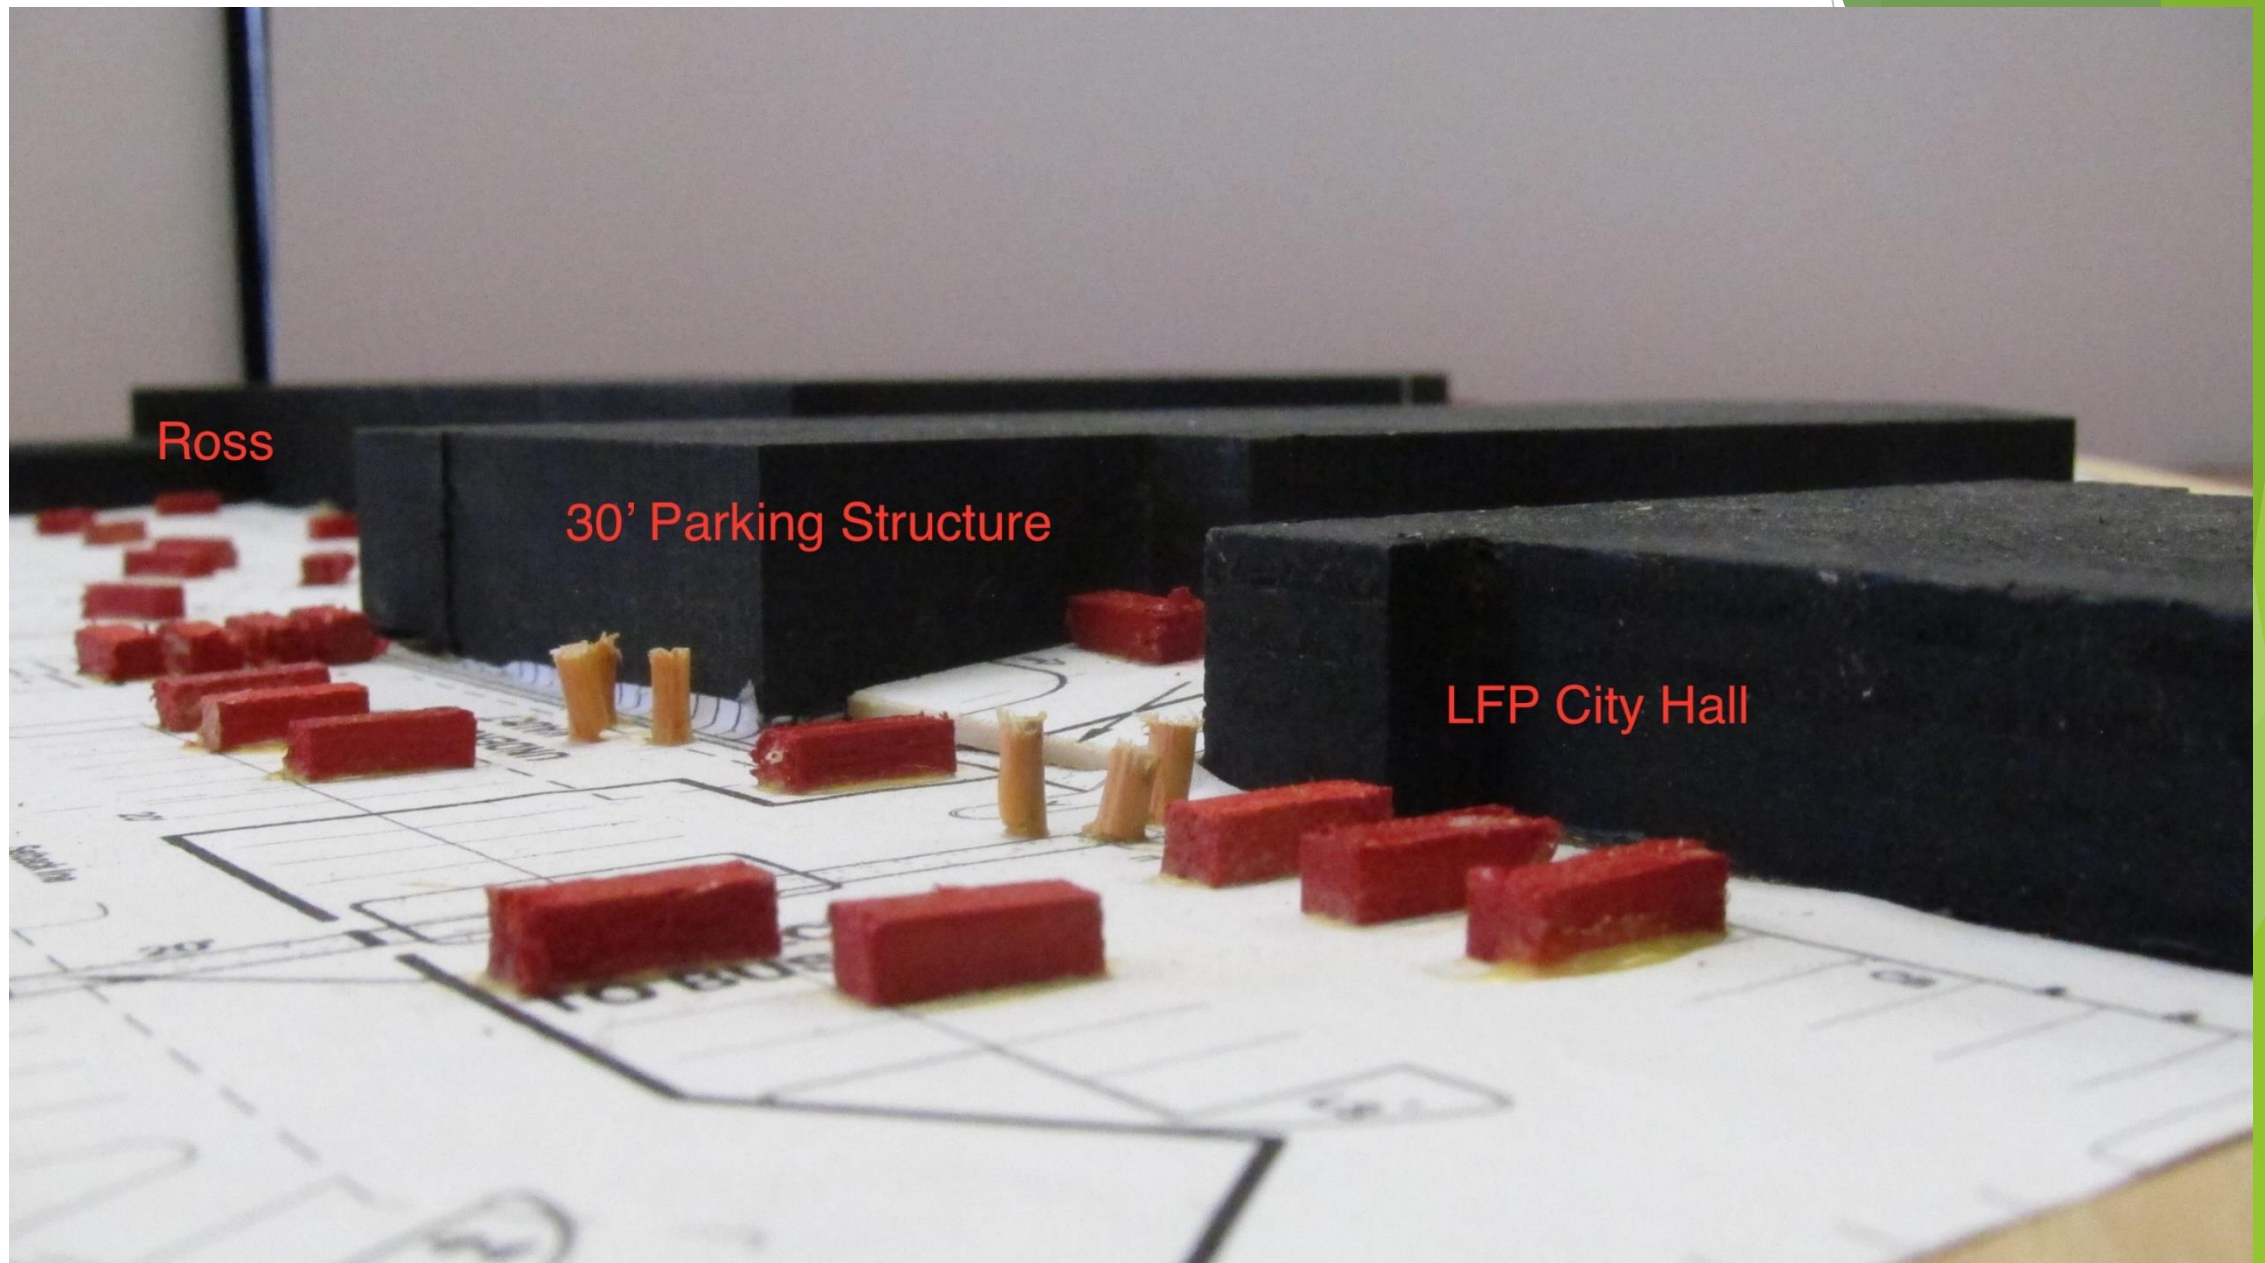

A photograph of a physical architectural model. The model is built on a white base with faint, hand-drawn lines representing a site plan. In the background, a large, dark, rectangular structure is constructed from stacked black blocks. To the left of this structure is a smaller black block. To the right is another black block. The foreground is populated with numerous small, rectangular blocks in red and yellow, arranged in various patterns. The entire scene is set against a plain, light-colored background.
